Abstract
This document describes new features, installation and update instructions, and known limitations for the HPE Virtual Connect SE 32Gb FC Module for HPE Synergy. This release is intended for administrators that configure, manage, and troubleshoot compute modules interconnects and storage systems on HPE Synergy using HPE Synergy Composer powered by HPE OneView.
Notices

The information contained herein is subject to change without notice. The only warranties for Hewlett Packard Enterprise products and services are set forth in the express warranty statements accompanying such products and services. Nothing herein should be construed as constituting an additional warranty. Hewlett Packard Enterprise shall not be liable for technical or editorial errors or omissions contained herein.

Interconnect module firmware installation and update instructions

Changes delivered in HPE Virtual Connect SE 32Gb FC Module for HPE Synergy

Changes delivered in firmware version 5.10.69

This firmware version is designed to:

• Disable weak ciphers that were incorrectly enabled in FIPS mode.
• Block UDP port 52357.
• Fix a firmware activation issue that occurs during a logical enclosure (LE) firmware update.

Changes delivered in firmware version 5.00.50

This firmware version includes the following features:

• FIPS validated mode.
• Certificate management.
• Self-test failure reporting.
• Automatic login redistribution.
• N-Port trunking with an upstream or top-of-rack Brocade switch.
• DNS and hostname support.
• Port mirroring.
• Telemetry interface.
• FC Port performance data.
• SNMPv3.
• Audit logging.
• CPU utilization monitoring.
• Port ID control for uplink ports.

NOTE: The HPE Virtual Connect SE 32Gb FC Module for HPE Synergy requires HPE OneView 4.20 or later as a prerequisite.
More firmware update information

The following table indicates disruptive versus non-disruptive firmware updates.

- Non-disruptive firmware update is a warm reboot of the management plane that does not impact the switching or data plane.
- Disruptive firmware update is a cold reboot of the interconnect module that impacts both the management and data plane.

Support and other resources

Accessing Hewlett Packard Enterprise Support

- For live assistance, go to the Contact Hewlett Packard Enterprise Worldwide website:
  
  http://www.hpe.com/info/assistance

- To access documentation and support services, go to the Hewlett Packard Enterprise Support Center website:
  
  http://www.hpe.com/support/hpsc

Information to collect

- Technical support registration number (if applicable)
- Product name, model or version, and serial number
- Operating system name and version
- Firmware version
- Error messages
- Product-specific reports and logs
- Add-on products or components
- Third-party products or components

Accessing updates

- Some software products provide a mechanism for accessing software updates through the product interface. Review your product documentation to identify the recommended software update method.

- To download product updates:

  Hewlett Packard Enterprise Support Center
  
  www.hpe.com/support/hpsc

  Hewlett Packard Enterprise Support Center: Software downloads
  
  www.hpe.com/support/downloads

  Software Depot
  
  www.hpe.com/support/softwaredepot

- To subscribe to eNewsletters and alerts:

  www.hpe.com/support/e-updates

- To view and update your entitlements, and to link your contracts and warranties with your profile, go to the Hewlett Packard Enterprise Support Center More Information on Access to Support Materials page:

  www.hpe.com/support/AccessToSupportMaterials

IMPORTANT: Access to some updates might require product entitlement when accessed through the Hewlett Packard Enterprise Support Center. You must have an HPE Passport set up with relevant entitlements.
Customer self repair

Hewlett Packard Enterprise customer self repair (CSR) programs allow you to repair your product. If a CSR part needs to be replaced, it will be shipped directly to you so that you can install it at your convenience. Some parts do not qualify for CSR. Your Hewlett Packard Enterprise authorized service provider will determine whether a repair can be accomplished by CSR.

For more information about CSR, contact your local service provider or go to the CSR website:

http://www.hpe.com/support/selfrepair

Remote support

Remote support is available with supported devices as part of your warranty or contractual support agreement. It provides intelligent event diagnosis, and automatic, secure submission of hardware event notifications to Hewlett Packard Enterprise, which will initiate a fast and accurate resolution based on your product's service level. Hewlett Packard Enterprise strongly recommends that you register your device for remote support.

If your product includes additional remote support details, use search to locate that information.

For Hewlett Packard Enterprise environmental information, including company programs, product recycling, and energy efficiency, see:

www.hpe.com/info/environment

Documentation feedback

Hewlett Packard Enterprise is committed to providing documentation that meets your needs. To help us improve the documentation, send any errors, suggestions, or comments to Documentation Feedback (docsfeedback@hpe.com). When submitting your feedback, include the document title, part number, edition, and publication date located on the front cover of the document. For online help content, include the product name, product version, help edition, and publication date located on the legal notices page.
